

# Fed up with having to maintain and repair sets of old and worn out surgical power tools? Then help is at hand...

Designed and manufactured in the United States, the SmartPower™ range of fully disposable Sternum, Oscillating and Reciprocating Saws, Drills and Reamers are a cut above the rest. Used successfully for the past five years in thousands of operations worldwide, they provide a reliable power source on demand wherever and whenever you need it.

Lightweight, easy to handle and never found wanting, the SmartPower™ range is pre-sterilised and ready to use 'fresh out of the box.' No more worries about equipment failures, re-sterilisation or any associated maintenance costs. Simply remove the packaging, plug in the tool, use it and then dispose of it.

**Opportunities may be available for Agents/Distributors in certain areas.**

Please contact us to learn more about the benefits of stocking the SmartPower™ range of tools.

## SmartPower™ Oscillating Saw

Lightweight, allowing for optimal manoeuvrability as well as minimising wrist fatigue, this saw is ideal for use in orthopaedic osteotomies and other bone cutting procedures.

## SmartPower™ Reciprocating Saw

Designed for use when performing transverse osteotomies such as cutting off the head/neck of the femur during total hip procedures, general orthopaedic osteotomies and other bone cutting procedures.

## SmartPower™ Sternum Saw

Designed for use in thoracic surgery, the saw weighs only 32oz, providing the user with greater flexibility and mobility.

## SmartPower™ Drill

Designed for drilling holes and placing bone screws in a variety of reconstructive and trauma procedures.

## SmartPower™ Reamer

For use in orthopaedic procedures which require boring, drilling and reaming, the SmartPower™ Reamer is ideal for difficult procedures where continuous power is critical.
